

RENZ DANNIEL R. RAPANUT

PROFILE

Computer Engineering student with strong problem-solving skills, technical knowledge, and internship experience. Passionate about technology and committed to continuous learning.

TECHNICAL SKILLS

Programming

- JavaScript
- TypeScript
- Python
- Java
- HTML
- CSS

Frontend Development

- React.js
- Vite.js
- Tailwind CSS
- UI / UX Design

Backend Development

- Node.js
- Express.js
- MongoDB
- REST APIs

Tools and Testing

- Git / GitHub
- Postman
- Playwright
- Figma / Photoshop

Office Applications

- Microsoft Word
- Excel
- PowerPoint
- Google Workspace

WORK EXPERIENCE

FULL STACK DEVELOPER (INTERN)

Gallium31 Corporation | 2025-2026

- Contributed to the development and maintenance of web applications by implementing front-end enhancements, improving responsiveness, and ensuring a consistent user experience across multiple company websites.
- Performed automated testing using Playwright and collaborated with the development team through Git-based workflows for version control, code reviews, and feature integration.

EDUCATION

FAR EASTERN UNIVERSITY INSTITUTE OF TECHNOLOGY

BS in Computer Engineering | 2030-present

COURSEWORK:

- Data Structures & Algorithms
- Object-Oriented Programming
- Database Systems
- Software Engineering
- Computer Networks
- Hardware Engineering
- Computer Architecture
- Digital Logic Design
- Electronic Circuits

CERTIFICATES AND BADGES

- CyberOps Associate – Cisco Networking Academy (July 2025)
- Cisco Certified Support Technician (CCST) Networking (Lifetime Certification) – Certiport (March 2025)
- CCNA: Enterprise Networking, Security, and Automation – Cisco Networking Academy (November 2024)
- CCNA: Switching, Routing, and Wireless Essentials – Cisco Networking Academy (July 2024)
- Introduction to Networks – Cisco Networking Academy (April 2024)
- Introduction to Cybersecurity – Cisco Networking Academy (March 2024)
- IT Specialist – Java – Certiport (July 2023)

PROJECTS

NURTURE – Automated Chicken Eggshell Fertilizer Production and Dispensing System

- Capstone Project
- Developed an Arduino-based automated system that processes eggshell fertilizer and monitors soil pH and moisture to support cucumber cultivation.
- Integrated multiple sensors and automated dispensing mechanisms to improve fertilizer application efficiency and soil condition monitoring.
- Tech Stack: Arduino Uno, C++, Soil pH Sensor, Soil Moisture Sensor, DC Motor, LCD Display

Health Monitoring System with Pulse Rate and Temperature Sensors

- Embedded Systems / IoT Project
- Designed and developed a portable Arduino-based health monitoring system that measures pulse rate and body temperature in real time.
- Integrated an LCD display and GSM module to automatically send SMS alerts when abnormal heart rate thresholds are detected.
- Tech Stack: Arduino Uno, Pulse Sensor, MLX90614 Temperature Sensor, GSM Module, LCD I2C Display, Embedded C, Arduino IDE

CRUD_BY_RENZ – User Management System

- Full-Stack Web Application
- Built a full-stack CRUD application with secure user authentication, registration, and user management using React, Node.js, Express, and MongoDB.
- Developed RESTful APIs, organized backend architecture with controllers and middleware, and implemented protected routes for secure access.
- Tech Stack: React, Node.js, Express.js, MongoDB, Mongoose, JavaScript, Git
